# 10<sup>th</sup> REHVA WORLD CONGRESS

## "Sustainable Energy Use in Buildings"

[www.clima2010.org](http://www.clima2010.org)

## Invitation

We have the pleasure to welcome you to Clima 2010, the leading international scientific congress in the HVAC area in year 2010.

The **10<sup>th</sup> REHVA World Congress** will offer scientists, industries, building owners, consultants, engineers, architects and policy-makers a platform for the exchange of scientific knowledge and technical solutions.

### Theme and Scope:

#### ***Sustainable Energy Use in Buildings***

The theme of the congress is "Sustainable Energy Use in Buildings." Due to the decreasing energy sources of the World, the necessity of the sustainable energy needs and the protection of environment force us to focus on leaving a healthy world to the next generations.

The congress will cover all aspects of HVAC technology and focus on the use of sustainable energy in buildings by applying the latest research and technical innovations into practice. The scope of the congress is HVAC and its applications in using sustainable energy in all types of buildings.

### Specific Congress Themes:

- Sustainable energy systems
- Energy performance of buildings
- Energy efficient heating and cooling systems
- HVAC system desing and performance
- Indoor environment, health and productivity
- Natural and hybrid ventilation systems
- Maintenance and operation of HVAC systems
- Domestic water and waste systems
- ICT and intelligent buildings

## **Congress Format**

The congress will begin on the first day with an Opening Ceremony hosting the international scientific presentations and highlights of Turkish Culture. The technical program will run for four days followed by a Closing Ceremony with a Farewell Coffee on the last day. There will be a special dinner "Turkish Night" on the second and a Conference Banquet on the third night, each followed by an evening party.

## **The Technical Program Will Contain:**

- Keynote sessions with eminent speakers from the academic community and HVAC.
- Scientific sessions with full technical papers, oral and poster presentations on recent research results.
- Practical sessions with short technical communications and poster presentations on practical applications of HVAC technology.
- Pre-planned REHVA-workshops on concurrent problems and international possibilities for solving them.
- \* An exhibition of sponsors will be arranged in conjunction with the conference.
- \* The program will also contain pre and post-congress excursion possibilities.
- \* The official language of the congress will be English.

## **Important Dates**

***Call for papers, October 2008***

***Deadline for abstracts, June 2009***

***Deadline for papers, January 2010***

***Clima 2010 Congress, 9 - 12 May 2010***

## **Antalya and Turkey**

Antalya is famous as a tourist region; taking place at the South coast of Turkey. Antalya; with its historical and cultural heritage, traditional hospitality, professional services and the modern destination for international congress delegations.

With the unique natural attractions, the warm climate, unpolluted sea-water, the hotels in international standards, the museums and antique cities containing the traces of ancient civilizations; Antalya, the capital city of Turkish Riviera, is ready to give complete and excellent services to the visitors and participants of the congress.

Antalya is selected for a Revolutionary concept in Rehva Clima 2000 Organizations. Antalya is well known by hosting many International Conferences of NGO's with its many 5 Star Hotels which are suitable for both conference and holiday. The new concept will enable your stay as an enjoyable one because;

- Clima 2010 participants will be staying at the same Conference Hotel [or at neighbour hotels],
- The participation fee will be much lower than the past and similar conferences,
- The accommodation cost will be much lower than many countries including the meal,
- There will be no time spent for transportation that will allow to have more free time,
- The participants will have more free time that will develop the friendship and cooperation,
- Turkey is a bridge between Europe and Asia, and is close to North Africa. This will gather much more HVAC fellows from all over the world.

The climate will be very nice during this time for planning holidays with low season prices; that will be interesting for many participants and their families to combine their holidays during the Conference and even in an extended stay... The direct flights to Antalya and over Istanbul are available from many big cities in Europe and all over the world, from New York to Beijing...

Organized by

On Behalf of

REHVA - The Federation of European Heating and Air Conditioning Associations

Supported by

American Society of Heating,  
Refrigerating and  
Air-Conditioning Engineers

European Committee of  
Air-Handling and Refrigeration  
Equipment Manufacturers

International Institute of  
Refrigeration

The Joint Organization of HVAC - Technology  
for the National Societies in Scandinavia,  
Iceland and the Baltic States

The Chamber of  
Mechanical Engineers - Turkey
